

## Non-Preemptive Scheduling

Your paper is clear and informative. I understand the topic just by reading your paper

Check your spellings for example noticeable under shortest job first. Some words are written in capital letter even if they are not supposed to be. Some words aren't spelt correctly. There are lots of spelling errors.

Would be better if you can explain your figures more clearly, like in figure 3, I do not understand your calculation used as an example to calculate waiting time and average turn around time.

Don't forget to put space after comma

No explanation of how each process are scheduled in figure 11
