- Very nicely explain with examples.
- Easier to understand.
- Informative and useful figures are being used.

- If the disadvantages of Tomasulo's algorithm are to be described as well that would have been more effective and informative.
- Figures are very small to read out and match with the explanations
- Check for Proper punctuation
- Reference is require

According to Moore's Law By CARLA TARDI in MARGUERITA CHENG 2022 "The number of transistors on a microchip doubles every two years, though the cost of computers is halved" [reference no]

- Grammatical structure is not correct. Verd is used instead of a Noun after Article.

In dynamic scheduling, there is a distinguish between when an instruction begins execution and when it completes execution, the instruction is in execution between the two times.

- Carefully check the algorithm name ➔ Tomasulo'S
- In figure-4 explanation, how the value .85 calculated that is not very clear.
- In DISCUSSION AND CONCLUSION section, it would be better to 'I' instead of 'we'.
- Link of Reference no 6 is not working.
